SOFTWARE

Medical Imaging Segmentation Toolkit (MIST)

The Medical Imaging Segmentation Toolkit (MIST) is a simple, fully automated framework for deep learning-based 3D medical image segmentation. The framework can seamlessly ingest various medical imaging data and is easily expandable to test new ideas (i.e., new architectures, loss functions, etc.). MIST is open source, written in Python for PyTorch and available at <https://github.com/aecelaya/MIST>.
